Jungle Jamboree Activity Descriptions

- **Living Fossils Replica Making**

This activity is a fun, hands-on way of learning the science of fossil replica making. Using living fossils, participants get to create their very own fossil replica to take home. This activity is educational, *for all ages*, and involves a science talk on fossil replica making.

- **Imitation Hot Lava**

This activity is a messy hands-on mixing project that creates a simulated lava that glows under the black lights. Participants get to take their own bag of lava home. This activity is not educational, yet very fun and exciting *for all ages*.

- **Poison Dart Frog Paper Plate Art**

This activity is for the art lovers. Using one paper plate, participants are challenged to create a poison dart frog using cut outs and tissue paper. After creating their frog, a party blower is inserted for the mouth, to create a moving tongue. This activity is not educational, yet very fun and exciting *for all ages*.

- **Flying Monkey Catch**

This activity is a silly game where participants get the chance to catch pretend flying monkeys in nets for a prize. This activity is not educational, yet fun and exciting *for all ages*.

- **Terrarium Creating**

This activity involves making personal terrariums to take home. Participants use a recycled water bottle, soil, and seeds to create this thriving growth environment. This activity is educational, *for all ages*, and involves a science talk on the topic of ecosystems.

- **Spiral Snake Art**

This activity is for the art lover. Taking a paper plate, participants are encouraged to create a spiral snake and decorate it with colored sands. This activity is educational, *for all ages*, and involves a science talk on snakes.

- **Tree Frog Toss**

This activity is a silly game where participants get the chance to sling sticky frogs onto point based jungle leaves. Teams are divided and the winners receive a small tree frog prize. This activity is not educational, yet fun and exciting *for all ages*.

- **Bubbling Lava Lamps**

This activity involves making simulated lava lamps using recycled water bottles, oil, water, dye, and beads. To create the bubbling effect, effervescent tablets are added at the end. This activity is not educational, yet fun and exciting *for all ages*.
